The proposed allotment will require concurrence by Mexico because it is located within 320 kilometers (199 miles) of the Mexican border.

Petitioner states that Amboy has a year-round population of 20 residents. Petitioner emphasizes, however, that Amboy is within a large "white" area, beyond the predicted service area of even a single radio station. Petitioner further represents that this white area includes several miles of heavily traveled Interstate 40, which carries an estimated 22,500 motorists per day through the Mojave Desert en route to Los Angeles, and an even longer stretch of Route 66. Petitioner states that neither residents of Amboy nor the many motorists who pass near Amboy have any means to learn of dangerous weather or traffic conditions or other area news.

Petitioner asserts that Amboy is one of the few surviving communities along a nearly 90-mile stretch of Route 66. Petitioner further states that Amboy has its own post office, motel, restaurant, and gas station, and is the site of a CalTrans railroad yard.

**Additional Information:** The proposed allotment of Channel 248A at Roundup requires a site restriction of 1.0 km (.6 miles) northeast of Roundup at the reference coordinates indicated above. The proposed allotment will require concurrence by Canada because it is located within 320 kilometers (199 miles) of the Canadian border.

Petitioner states that Roundup is a town of approximately 2,000 persons. Letters submitted in support of the proposed allotment aver that radio reception from stations in other communities is inadequate. Those letters also emphasize that a local radio station would facilitate dissemination of public alerts and emergency information as well as local news and announcements that are not currently available from stations located in nearby communities.

In compliance with §1.52 of the Commission's rules, petitioner is requested to include with his comments verification that the statements contained in the petition are accurate to the best of his knowledge.<sup>4</sup>
